

About Options Clinic:

Options Clinic is a 501(c)(3) corporation established in 1972. Their mission is to help create healthy lives and families by providing and advocating for sexual health and education. Options Clinic currently serves 5 counties in western Wisconsin with clinics located in La Crosse, Sparta, Prairie du Chien, and Richland Center. The clinics provide reproductive health services for over 6,500 people every year, and community education programs reach another 8,000 people through presentations, workshops, and conferences.

They believe that:

- When women have their annual exams, breast and cervical cancer can be detected in the early stages when it is more curable and survivable;
- When women and men have access to birth control, they have a better chance of achieving education, career, and economic goals therefore providing a healthier, more resourceful environment for their children when they are ready to make them a priority;
- When adolescents are given medically accurate sexuality education, including abstinence, they are more likely to delay the onset of sexual intercourse and more likely to use contraception and condoms when engaging in sexual behavior.

Options Clinic provides services to individuals based on a sliding fee scale and is the only clinic in its service area that offers reproductive health services even if the client is unable to pay. All services are provided in harmony with the personal beliefs of each client.
